New Edition!

Handbook of Micro/Nanotribology

Second Edition

Bharat Bhushan

With more than 500 illustrations and 50 tables, **Handbook of Micro/Nanotribology** covers the range of relevant topics, including characterization of solid surfaces, measurement techniques and applications, and theoretical modeling of interfaces.

What's New in the Second Edition?

- AFM instrumentation
- Surface forces and adhesion
- Design and construction of magnetic storage devices
- Microdynamical devices and systems
- Mechanical properties of materials in microstructure
- Micro/nanotribology and micro/nanomechanics of MEMS devices

Catalog no. 8402, 1999, 880 pp.
ISBN: 0-8493-8402-8, \$149.95 / £100.00

Fatigue Design

Life Expectancy of Machine Parts

Eliahu Zahavi

Ben Gurion University, Beersheva, Israel
with

Vladimir Torbilo

Perm Technical University, Russia

Modern analytical theories of fatigue coupled with a knowledge of processing effects on metals make up the sound basis for designing machine parts that are free from unexpected failure. **Life Expectancy of Machine Parts: Fatigue Design** provides the information and the tools needed for optimal design. It highlights practical approaches for effectively solving fatigue problems, including minimizing the risk of hidden perils that may arise during production processes or from exposure to the environment. Topics covered include • Solid Mechanics • Stress Method • Strain Method • Crack Propagation • Surface Integrity and Fatigue • Fatigue Life Improvement and • Diagnosis of Fatigue Cases.

Catalog no. 8970, 1996, 336 pp.
ISBN: 0-8493-8970-4, \$94.95 / £63.99

Bestseller!

The CRC Handbook of Mechanical Engineering

Editor-in-Chief

Frank Kreith

Professor Emeritus of Engineering, University of Colorado

Serving the professional engineering community with relevant background and current data from the field of mechanical engineering, this bestselling handbook:

- Addresses computer technology, global competition, improved communications, and advances in design and manufacturing
- Includes contributions from more than 100 international experts from industry, academia, and national laboratories
- Discusses the mechanics of solids, thermodynamics, fluid mechanics, heat and mass transfer, mechanical system controls, air conditioning and refrigeration, transportation, mathematics, and patent law

Catalog no. 9418, 1998, 2,624 pp.
ISBN: 0-8493-9418-X, \$134.95 / £90.00

ATTENTION PROFESSORS: Special prices for course-adopted textbooks may be available on certain titles. To review a book for class adoption, call, fax, or write us at the numbers listed below for more information regarding our Textbook Evaluation Program. An instructor's manual may be available with some titles.

PLEASE USE THIS ORDER FORM OR THE ORDER CARD IF AVAILABLE

Please indicate quantities next to the title(s) ordered below:

MODERN TRIBOLOGY HANDBOOK

Catalog no. 8403, ISBN: 0-8493-8403-6 at \$199.95 / £133.00 each.

Other titles of interest:

HANDBOOK of MICRO/NANOTRIBOLOGY, Second Edition

Catalog no. 8402, ISBN: 0-8493-8402-8 at \$149.95 / £100.00 each.

FATIGUE DESIGN: Life Expectancy of Machine Parts

Catalog no. 8970, ISBN: 0-8493-8970-4 at \$94.95 / £63.99 each.

The CRC HANDBOOK of MECHANICAL ENGINEERING

Catalog no. 9418, ISBN: 0-8493-9418-X at \$134.95 / £90.00 each.

SHIPPING AND HANDLING			
Region	Delivery Time	First Title	Additional Title
USA/Canada	5 Days	\$5.95	\$2.00
Europe	5 Days	£3.95	£1.95
Rest of the World	15-40 Days	\$8.00	\$2.00

For details of priority mail services, please contact your nearest office.

In NORTH & SOUTH AMERICA, ASIA, and AUSTRALASIA:

CRC PRESS

2000 N.W. Corporate Blvd., Boca Raton, FL 33431-9868, USA

Tel: 1-800-272-7737 or Fax: 1-800-374-3401

From Outside the Continental U.S.

Tel: 1-561-994-0555 or Fax: 1-561-989-8732

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice.

U.S./Canada: All orders must be paid in U.S. dollars. **TAX:** As required by law, please add applicable state and local taxes on all merchandise delivered to CA, FL, GA, IL, MA, NJ, NY, and Washington, DC. For Canadian orders, please add GST. We will add tax on all credit card orders.

European Orders: All orders must be paid in U.K. £. VAT will be added at the rate applicable.

Textbooks: Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm

Satisfaction Guaranteed: If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.

New! Understand the current state of the field Modern Tribology

HANDBOOK

Bharat Bhushan The Ohio State University, Columbus

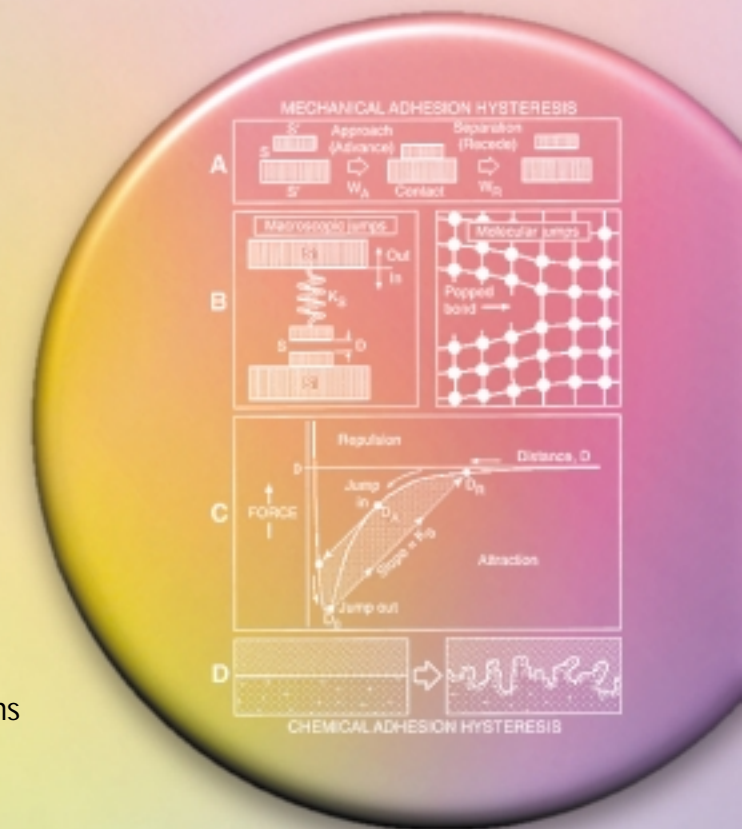

A volume in the **Mechanics and Materials** series — Series edited by Bharat Bhushan

bring yourself up to speed
on all the new technology

Recent research has led to a deeper understanding of the nature and consequences of interactions between materials on an atomic scale. The results have resonated throughout the field of tribology. For example, new applications require detailed understanding of the tribological process on macro- and microscales and new knowledge guides the rational design of material for these applications. A two-volume set, the **Modern Tribology Handbook** reports on the current state of the field as it reflects these developments, including all industrial applications.

features

- Presents new industrial applications, materials, coatings, and treatments
- Covers the tribology of processing systems like copiers printers, scanners, and cameras
- Addresses classical tribology and the rapidly developing micro/nanotribology
- Acquaints you with new technologies and developments —convenient and self-contained
- Includes approximately 1000 line drawings, photographs, micrographs, and tables and provides over 1000 equations

Modern Tribology Handbook

Catalog no. 8403, December 2000, 1,848 pp., ISBN: 0-8493-8403-6, \$199.95 / £133.00

See inside for more information...

Modern Tribology Handbook

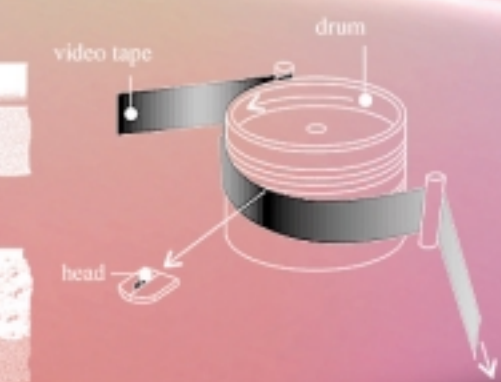

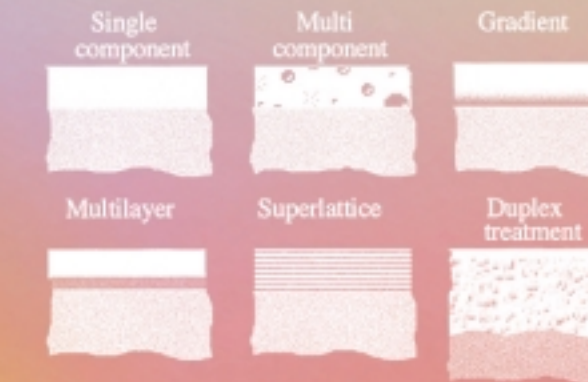

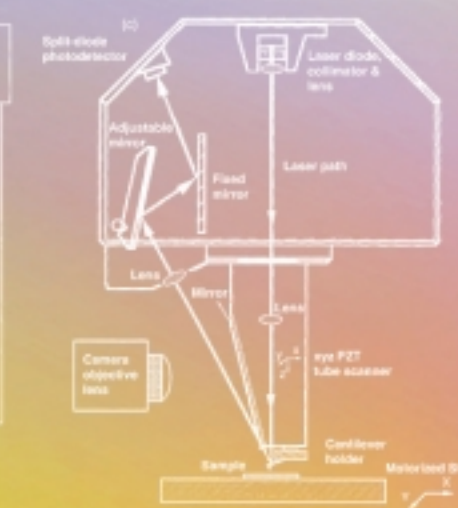

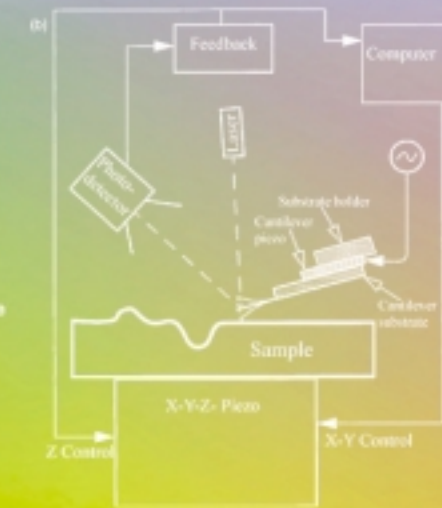

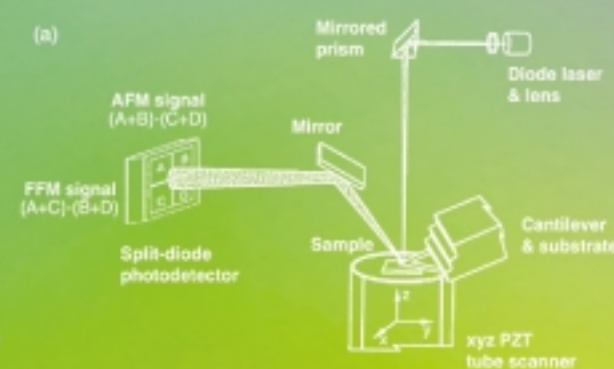

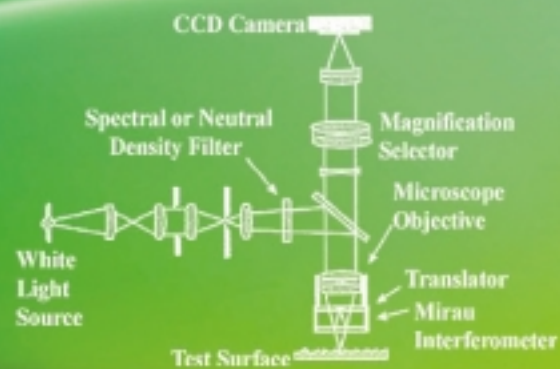

thorough, up-to-date, and easy to use

In the **Modern Tribology Handbook** you will get:

- A thorough review of the basic concepts of contact, friction, wear, and lubrication
- Comprehensive coverage of experimental studies
- The fascinating subject of molecular dynamics simulations
- An exploration of both conventional and new tribological materials
- Knowledge of the advantages and limitations of ceramics, diamond-like carbon and related films, and a wide range of coating composites
- A section devoted to industrial components and systems

all the information you need in one convenient source

Conventional tribology has become well established in the past fifty years but the few handbooks that exist are dated. The rapid evolution of micro- and nanotribology will cause it to take center stage for the next decade, but much of the new information has not made it into the hands that need to use it. Extensively illustrated and well-researched, the **Modern Tribology Handbook** gives you comprehensive information on conventional topics and, more importantly, emphasizes all industrial applications, including the fundamentals of the emerging field of micro-and nanotribology.

contents

Macrotribology, *B. Bhushan, F.E. Kennedy, and A. Szeri*

Introduction

Surface Physics in Tribology, *P. Abel and J. Ferrante*

Surface Roughness Analysis and Measurement Techniques, *B. Bhushan*

Contact Between Solid Surfaces, *J. Williams and R. Dwyer-Joyce*

Adhesion of Solids: Mechanical Aspects, *D. Maugis*

Friction, *K.C. Ludema*

Frictional Heating and Contact Temperatures, *F.E. Kennedy*

Wear Mechanisms, *K. Kato*

Wear Debris Classifications, *W.A. Glaeser*

Wear Maps, *S. Hsu*

Liquid Lubricants and Lubrication, *C.E. Snyder, Jr., L. Gschwender, S.K. Sharma, D.C. Kramer, B.K. Lok, M.L. Sztenderowicz, and R.R. Krug*

Hydrodynamic and Elastohydrodynamic Lubrication, *A. Szeri*

Boundary Lubrication and Boundary Lubricating Films, *S. Hsu and R.S. Gates*

Friction and Wear Measurement Techniques, *N. Axen, S. Hogmark, and S. Jacobson*

Design of Simulative Friction and Wear Tests, *P.J. Blau*

Friction and Wear Data Bank, *A.W. Ruff*

Micro/Nanotribology, *B. Bhushan and O. Marti*

Introduction

Microrheology and Microtribology of Molecularly Thin Liquid Films Using Surface Force Apparatus, *J.N. Isrealachvili and A.D. Berman*

Adhesion Studies Using Scanning Probe Microscopy, *O. Marti*

Atomic-Scale Friction Studies Using Scanning Probe Microscopy, *U.D. Schwarz and H. Hölscher*

Friction, Scratching/Wear, Indentation, and Lubrication Using Scanning Probe Microscopy, *B. Bhushan*

Molecular Dynamic Simulations, *M.O. Robbins*

Solid Tribological Materials and Coatings, *B. Bhushan, A. Erdemir, and K. Holmberg*

Introduction

Metals and Ceramics, *K. Kato and K. Adachi*

Solid Lubricants and Self-Lubricating Solids, *A. Erdemir*

Tribological Properties of Metallic and Ceramic Coatings, *K. Holmberg and A. Matthews*

Tribology of Diamond, Diamond-Like Carbon and Related Films, *C. Donnet and A. Erdemir*

Self Assembled Monolayers for Controlling Hydrophobicity and/or Friction and Wear, *B. Bhushan*

Mechanical and Tribological Requirements and Evaluation of Coating Composites, *S. Hogmark, S. Jacobson, M. Larsson, and N. Axen*

Tribology of Industrial Components and Systems, *B. Bhushan and S. Hsu*

Introduction

Tribological Components — Sliding Bearings, *D.E. Brewe*

Tribological Components — Rolling Element Bearings, *X. Ai and C.A. Moyer*

Tribological Components — Gears, *H.S. Cheng*

Tribological Components — Rotary Dynamic Seals, *R. Salant*

Space Tribology, *W.R. Jones and M.J. Jansen*

Automotive Tribology, *A. Kapoor, S. Tung, S.E. Schwartz, M. Priest, and R. Dwyer-Joyce*

Diesel Engine Tribology, *M.G. Naylor, P. Kodali, and J.C. Wang*

Railroad Tribology, *A. Kapoor, M. Ishida, K.J. Sawley, and F. Schmid*

Earthmoving Equipment Tribology, *J.A. Hawk and R.D. Wilson*

Marine Equipment Tribology, *S.R. Schmid and K.J. Schmid*

Tribology in Manufacturing, *S.R. Schmid and W.R.D. Wilson*

Macro- and Microtribology of Magnetic Storage Devices, *B. Bhushan*

Macro- and Microtribology of MEMS Materials, *B. Bhushan*

Mechanics and Tribology of Flexible Media in Information Processing Systems, *R.C. Benson and E. Mockensturm*

Biomedical Applications Tribology, *J. Fischer*

Technologies for Machinery Diagnosis and Prognosis, *R.D. Cowan and W.O. Winer*

Glossary of Terms in Tribology, *F.E. Kennedy and P.J. Blau*
