News From the Field

SCIENTISTS DEVELOP MESH THAT CAPTURES OIL--BUT LETS WATER THROUGH

April 15, 2015

A stainless steel mesh with a high-tech coating captures oil, but water passes right through it. With further development, researchers at Ohio State University say, "you could potentially catch an oil spill with a net." Full Story

The National Science Foundation (NSF) is an independent federal agency that supports fundamental research and education across all fields of science and engineering. In fiscal year (FY) 2015, its budget is $7.3 billion. NSF funds reach all 50 states through grants to nearly 2,000 colleges, universities and other institutions. Each year, NSF receives about 48,000 competitive proposals for funding, and makes about 11,000 new funding awards. NSF also awards about $626 million in professional and service contracts yearly.
